Extensie installatie afgebroken.

Pakket Update: Er is een fout opgetreden bij het installeren van een extensie: com_jem.zip

ℹ 15 bestanden die een override hebben in het template zijn bijgewerkt en de wijzigingen moeten bekeken worden.

⊗ Fout bij het installeren van pakket

JEM is an Event Management Component for Joomla.

It's not a classical calendar – it is an easy way to manage and present your events for your group, company or community.
JEM offers a lot of features and possibilities which make your work easier, like the Venue database, Event recurrence, Auto geotagging and much more.
But also for your site visitors, JEM has some additional features to offer, like a simple registration system, map service links, or the submission/edit of events and venues from the frontend ...

This package consists of the JEM component combined with the following essential modules and plugins:

- **Search plugin**
- **Finder plugin (smart search)**
