

How to insert the JEM Basic Module in an E-mail in AcyMailing 8?

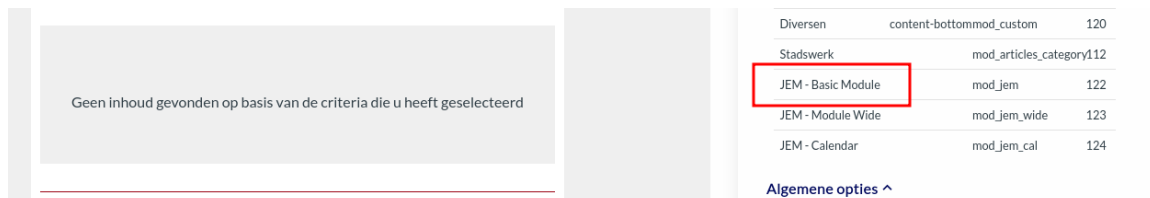

1. Make a new block in the email you are editing

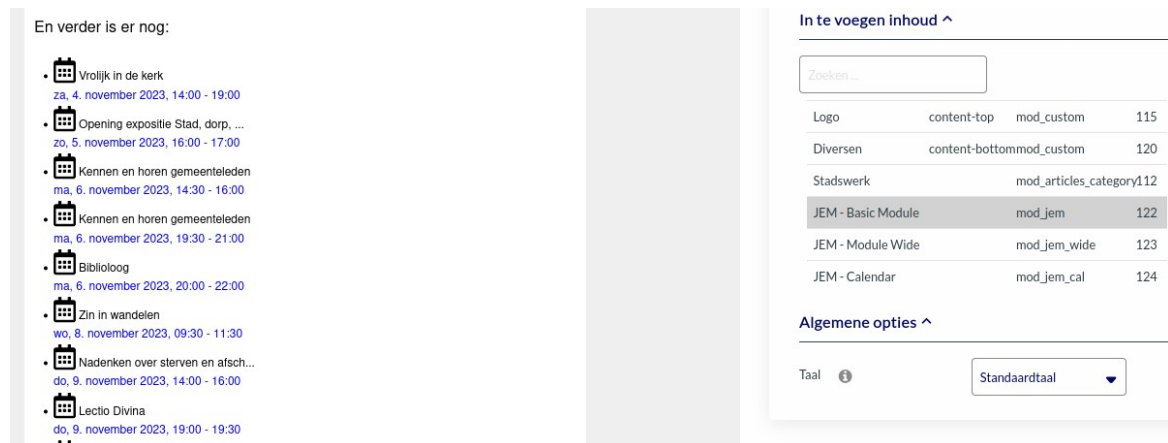

2. Insert a module in the new block

3. Then you get a new menu at the right, with among other things, the JEM Basic Module

4. Then click and the module will be inserted into the block

5. Here you see long list of events of the current month
